

## DOMINÓ NUMÉRICO

### Instrucciones del juego

Pueden jugar al dominó de 2 a 4 jugadores y jugadoras.

Repartimos siete tarjetas a cada participante. Dejamos las tarjetas restantes, si las hay, boca abajo encima de la mesa.

Comienza el juego quien tiene la tarjeta “6 / seis peces” poniéndola visible en el centro de la mesa. Si ningún jugador tiene esta tarjeta, iniciará el juego quien tenga la tarjeta “5 / cinco peces”. Si nadie dispone de esta tarjeta, iniciará el juego quien tenga la tarjeta “4 / cuatro peces”. Así sucesivamente.

El siguiente jugador o jugadora continúa el juego, tirando una tarjeta que tenga una de sus partes que se corresponda en número o cantidad a lo indicado en cualquiera de las partes de la tarjeta anterior. La nueva tarjeta se coloca conectando las dos partes relacionadas de las tarjetas.

De manera sucesiva y ordenada, los jugadores y las jugadoras colocan sus tarjetas conectándolas por las partes que mantienen una relación de número y/o cantidad (por ejemplo: “número 1” con “número 1”, “número 2” con “dos peces”, “cuatro peces” con “cuatro peces”, etc.).

Cuando un jugador o jugadora no tiene ninguna tarjeta que se corresponda con una de las dos partes libres de las tarjetas extremas de la hilera, cogerá una tarjeta de las sobrantes que hemos dejado boca abajo, mientras las haya. Si la tarjeta que ha escogido tampoco le sirve, continuará el juego el jugador o jugadora siguiente.

El juego finaliza cuando un participante se queda sin tarjetas o cuando ningún participante tiene opción de sacar más tarjetas.

Por otro lado, podemos realizar otras actividades con las tarjetas de dominó. Por ejemplo, podemos jugar a colocarlas en orden, poniendo en una misma columna las tarjetas que empiezan por el mismo número, ordenando las columnas siguiendo la serie numérica y a la vez distribuyendo las tarjetas de cada columna en filas según la cantidad de peces que contienen (de uno a seis peces).
